

Google Cloud Skills Boost

MODULE 1

7 principles for responsible AI

1. AI should be socially beneficial.

04:27

2. AI should avoid creating or reinforcing unfair bias.

04:32

3. AI should be built and tested for safety.

04:36

4. AI should be accountable to people.

04:39

5. AI should incorporate privacy design principles.

04:43

6. AI should uphold high standards of scientific excellence.

04:47

7. AI should be made available for uses that accord with these principles.

Google Cloud infrastructure layers

Security L1

Compute and storage L2

Unstructured data, Media files

Structured data

1. Transactional workload
2. Analytical workload

Data and AI products L3

1. Storage has 5 Apps/tools
2. Analytics has 2 apps/tools
3. Machine learning has 4 apps/tools
